

AI Prefab Solutions

Speed to power, without compromise.

A critical-infrastructure manufacturer and registered engineering firm in the Austin, TX area. We design, build, and factory-test prefabricated power and IT solutions that bring hyperscale data centers and semiconductor facilities online **faster, safer, and more reliably** — one accountable partner from high-voltage distribution to the compute.

50%

Faster speed to power vs. stick-built

100%

Factory-tested before it ships

100+ yrs

Combined leadership experience

200,000

Sq ft HQ facility — Hutto, TX

WHAT WE BUILD

Power Modules

Enclosed switchgear, UPS, transformers & distribution as one integrated unit.

Power Skids

Open, skid-mounted power assemblies — pre-wired and factory-tested.

HV Substation Prefab

Transport-ready high-voltage substations to speed grid interconnection.

Behind the Meter

On-site generation, independent of grid interconnection timelines.

HOW WE DELIVER

01 Engineer → 02 Fabricate → 03 Test → 04 Deploy

INDUSTRIES WE SERVE

Hyperscale Data Centers · Semiconductor · AI & High-Density Compute
